

Business Master File

Standing at over 3.1 million, this database provides a comprehensive view of the UK business market. Using a unique business classification system as well as SIC codes, this file penetrates to the very core of your market. In addition, the records can be selected by a wide range of variables, so you can slim down your list with ease and precision to suit your exact marketing needs. It's the big file that hits even the smallest target. It's not called the "Master" File for nothing.

Data Hygiene:

The majority of owned databases are created from information generated from the parent company activity. The Whichlist.com Business Master File is a mixture of multi sources thus ensuring a cleaner and more accurate database with a wider selection of criteria and with over 170,000 amendments per week. The result is a 98% deliverability guarantee (4% above industry guidelines). All exercises are passed through the MPS, TPS, CTPS & FPS before despatch, ensuring total peace of mind for our clients.

Selections:

- Geographical by Country, County, City, Postcode, Radius etc.
- Business Sector SIC, Class Code etc.
- Employee Size Size of workforce at location
- Premise Type Head Office, Single Site, Branch etc
- New Companies Newly Formed, Recently Moved
- Contact Data Telephone, Fax, Email Address
- Financial Data Company Turnover
- Other Selections Ltd, Plc, Importer, Exporter, Industrial Estates plus many more

Why is Whichlist.com Different?

Firstly, our policy is honesty and clarity to our clients. We supply what we say we will and If we cannot do it, we say so

Secondly, our counts are provided in 2 hours and orders within 5 hours. Amending and advising to ensure success is our main objective

Thirdly, we understand that price is second to quality and accurate targeting. But we still can offer the best value prices on the UK market

Finally, as a family company we strive to build up friends within our client base. That means we can talk and solve any problems amicably and quickly
